## Wind Component Rail Hub Opens In Wyoming

NAW Staff, Thursday 21 May 2009 - 10:14:02

Wyoming's Casper Logistics Hub (CLH Global) is the newest logistic center in the western U.S. It consists of 700 acres of industrial land located near BNSF Railway's Class I rail lines, Casper/Natrona County International Airport, the Foreign Trade Zone and major U.S. and interstate highways.

The hub's 24/7 services include transloading, trucking, erecting, storage, warehouse and switching. CLH Global has a large transload facility that is managed by Casper Transloading and is operated by Bighorn Divide & Wyoming Railroad Inc. The facility has access to heavy-capacity forklifts, heavy-haul trucks and 80-ton to 600-ton cranes that can handle a variety of commodities, according to the company.

CLH Global recently constructed a 50-acre secured storage site for wind components. Rail transportation for wind components continues to gain popularity, and with BNSF Railway's partnership, the company can distribute goods from all major ports and cities throughout the U.S.
